

ADC222 Force Ignition Tool - Code D748072AD

March 2017

The Force Ignition Tool from Advanced Diagnostics provides auto locksmiths the ability to force the ignition on various makes and models that include Audi®, Volkswagen®, Seat® and Škoda® vehicles via the OBD socket when a key is unavailable.

What does the Force Ignition Tool do?

The Force Ignition Tool is a versatile plug and play tool. Simply plug it into the vehicle's OBD port and then plug your ADC250 master cable and Pro tester into the ADC222. When you press ON, the ADC222 automatically supplies an ignition feed via the OBD socket without the need for a key. The locksmith can read the pincode with the MVP Pro or AD100 Pro prior to cutting a key.

Vehicle Applications

- Audi® A1 - 2011-2014
- Audi® A3 - 2003-2012
- Mini® One - 2001-2006
